

Method Statement

For

Hilti DX/GX Mock-Up Testing

Hilti Far East Pte Ltd 20 Harbour Drive I #06-06 PSA Vista I Singapore 117612

> T +65-6777 7887 | F +65-6777 3255 www.hilti.com.sg

- 1. Fasten the testing bracket with DX/GX nail using Hilti DX/GX system in accordance to Hilti's Direct Fastening Technology Manual (DFTM)^(A)
- 2. Set up a loading frame with a pulling fixture over the testing bracket ^(B)
- 3. Check to ensure that the pressure is fully released by turning the hand wheel anti-clockwise on the Hilti Mark 4 Tester
- 4. Untighten the hexagon nut for the Hilti Mark 4 Tester to be mounted on for testing
- 5. Slide the Hilti Mark 4 Tester in position over the anchoring system, the hook-slot should pass under the circular nut up to the stop-plate ^(C)
- 6. Set the red indicator needle to zero ^(D)
- 7. Hold the Hilti Mark 4 Tester firmly and turn the hand wheel clockwise, continue turning until the desired tensile load (kN) is achieved ^(E)
- Once the reading has stabilized at the desired tensile load (kN), observe that the reading hold for 1 minute before releasing the Hilti Mark 4 Tester ^(F)
- 9. Recommended 5 fastening mock-up
- 10. Mock-up will be done for Work Load, Test Load and Ultimate Load**

T +65-6777 7887 | F +65-6777 3255 www.hilti.com.sg

^{**} Ultimate load will be until failure or 3 times of test load whichever comes first
